

## **Jazinga Small Business Phone Systems Completed Interoperability Testing with Yealink IP Phones**

*Business class SIP telephones auto-provision for use with Jazinga's small business phone software or hardware systems*

Toronto, Canada and Xiamen, China ([PRWEB](#)) August 30, 2011 -- Jazinga, a Toronto-based provider of a leading-edge IP PBX communications solution equipped and priced specifically for organizations of fewer than 50 people, and Yealink, a leading designer and manufacturer of IP Voice and Video phones, announced today the successful conclusion of extensive interoperability tests between Jazinga's auto discovery and configuration capabilities and Yealink's IP Phones (models include T12P, T20P, T22P, T26P and T28P) Jazinga's customers, whether using SIP trunking services or traditional phone lines for their system, can now easily utilize and configure any of Yealink's phones. Jazinga's unique, multi-vendor, automated phone provisioning and setup wizard makes it a snap to add Yealink's innovative phones to Jazinga's fully-featured and affordable corporate communications system.

"We are further strengthening our portfolio of supported IP handsets from industry leading and trusted IP phone manufacturers with this addition of Yealink," states Rod Weir, Jazinga's Vice President of Alliances. "Users can now easily, in only a very few minutes with a minimum number of steps via our setup wizard, add any of Yealink's high performing and attractively priced audio and video phones. Providing price-sensitive SMB customers with these new high-performing hand set options broadens our appeal to this market segment".

"We are pleased to have our phones tested with Jazinga," said Stone Lu, VP of Yealink, "We share the same commitment of bringing cost-effective solution to SMBs, and the interoperability between our products will undoubtedly offer new options to our mutual customers."

### About Jazinga

Jazinga provides affordable, yet multi-featured, communications software and hardware systems designed especially for small businesses. Ideally suited to organizations of fewer than 50 people, both the downloadable PBX software and the Unity 2000 IP PBX appliance are sophisticated corporate phone systems, distinguished by their simple to use interfaces, their wizard-driven installation and telephone auto-configuration capability enabling a less than 20 minute setup time. The systems support a mix of traditional and/or VoIP services. Jazinga Inc. is privately held and headquartered in Toronto, Canada. For more information, please visit <http://www.jazinga.com>.

### About Yealink

Founded in 2001, Yealink is the professional designer and manufacturer of IP Phone and IP Video Phone for the world-wide broadband telephony market. For more than ten years, Yealink has focused on VoIP products characterized by high cost-performance, easy deployment and affordable price. Yealink benefits customers from flexibility and broad interoperability with the major IP-PBX, softswitch and IMS in the market. Chosen by famous carriers, enterprises and clients from over 100 countries, Yealink provides SMB and diversified customers from all over the world a best choice to extend the value of network communication.
